OPPORTUNITIES FOR TEACHING FOREIGN LANGUAGES IN UZBEKISTAN

Khusainboyeva Robiya Khojaboyevna

Student at the Faculty of Philology and
Language Teaching at Ma'mun University

Annotation: This article is aimed at encouraging the attention of today's youth to study foreign languages, spend their time productively, and respond appropriately to the opportunities provided by our country.

Key words: language, communication, inter-ethnic relations, education, acquired knowledge, innovations, intelligence.

Language is the main means of communicating with people from all over the world and establishing warm inter-ethnic relations. Today, attention to the field of education has increased even more. Several laws of our president on the education system have been introduced. Adding, it is no exaggeration to say that it brought a smile to their faces. In addition, innovations of a different style from the "educational system of foreign countries" were introduced into the work being carried out in the field of education. "In-depth subjects" were taught in schools. New schools were built and equipped in a modern style clubs for children were organized. This opened the door to new opportunities for the young generation. Our children are fully using these opportunities, working on themselves, getting qualified education in foreign countries, developing their intelligence and understanding, and preparing themselves to become professional professionals.

According to the facts, there are about 7,000 languages in the world, and language is considered the basis of society. Because the language of each country is dear and sacred to itself. Language is the main link of the country, and at the same time, our ancestors did not say for nothing that "He who knows the language knows." It is not wrong to say that even today language learning and making children interested in language has become the demand of the time. It should be said that among the languages, the mastering of English, Russian, French, Italian, German and Japanese languages is more successful than other languages. In particular, today, the English language has become the official language or the second language of many countries and managed to attract the most people. Because the particles of this language spread to the streets and cities of the whole world. If you know this language, you can communicate in any country and you can get a job. In the modern world, compared to other languages, the English language is the first language that is

most supported by creative people in different countries. There are several factors that have brought English to the status of an international language. For example, many names of drugs and their methods of use, many information on the Internet, are written in this language. Today, it is used in mass media, science, business, medicine, education, scientific research. It is a language that plays a leading role in fields such as journalism and technology. In the new era, new tasks and responsibilities have been assigned to the representatives of each field. Due to modern technologies, the methods of teaching the English language have changed significantly. In addition, on television, cartoons and entertaining programs for children to teach the English language are continuously shown on television. technology is slowly replacing traditional teaching on television, cartoons and entertaining shows are continuously shown on many TV channels to teach English to children. This helps children to get to know the language, at least to acquire basic skills. Technologies are gradually replacing traditional teaching on television, cartoons and entertaining shows are continuously shown on many TV channels to teach English to children. This helps children to get to know the language, at least to acquire basic skills. Technologies are gradually replacing traditional teaching.

It serves the development of the young generation's worldview and intellectual potential. At this point, a question arises. Why do we learn English from the 1st grade, but we still cannot communicate? After all, a person who has studied the language for 11 years must know it perfectly. But unfortunately, this is not the case. A person who wants to learn a language pays extra money and attends courses. And you can see that he can speak the language easily within two years. What is the main reason for this? One of the initial reasons was that the textbooks were not perfect. English language books were more focused on teaching grammar, and there were almost exercises to develop speaking and listening. full attention is paid to the formation of all aspects of the language. There are also interesting pictures and games in the book. It is written in a simple and fluent language that the student can understand the topic sitting alone. This book also increases the interest of children in learning a language. Another reason is that students think that language is necessary only to become a teacher of this language. It is no secret to you and us that it is not an interest, but a demand of the times. There are many useful aspects of learning a foreign language. A person who knows the language increases the chances of living and working or studying in foreign countries. Naturally, the scope of thinking of a person who has seen the world is very wide. He approaches every issue in a creative way.

THE ROLE OF EXACT SCIENCES IN THE ERA OF MODERN DEVELOPMENT

As a result of the orders and proposals given by the head of our state, teaching in foreign languages is currently being conducted in 25 higher education institutions in our country. In 2016, there were only 7 of them. The number of students who received an international language certificate increased 10 times in the last 3 years. This is one of the biggest achievements in recent years. Like all countries, Uzbekistan believes that the future of the country is the youth. That's why they say "The future is in the hands of the youth". If we get education now, our children will follow us in the future. eat Since there is so much bright light in front of us, let's light our way as soon as possible! Thanks to our acquired knowledge, we can distinguish good from bad, turn night into day, oppression into justice, laziness into work, and ingratitude into patience.

Knowing a foreign language is beneficial not only to us, but also to our beloved country. Over the years, our country has been developing rapidly in order to meet world standards. It is building buildings worth boasting in the world, conducting scientific research, and at the same time educating young people who will raise its flag high. As our president said, knowing foreign languages will open the doors of the world for us. Including: 50% additional amount was introduced to the monthly salary of English language teachers. This increased teachers' sense of pride in their profession. According to the decisions signed by President Shavkat Mirziyoyev in 2022, every teacher who teaches foreign languages must have an international or national certificate from the academic year of 2022. In accordance with this decision, teachers and all future pedagogues are preparing to further strengthen their knowledge and obtain a certificate.

In conclusion, as we live in a time that is developing with fast images, we must also be appropriate and unique to this time. What is different or lacking about us from other children? You can study, work and, most importantly, reach the level of a perfect human being. At the same time, you will have the opportunity to raise the status of your heavenly country, which has created facilities for you to learn the language, even higher."
