Abstract: *This article provides tips and advice on teaching ESP (English for Specific Purposes) students to speak using technology. This article outlines online resources, speaking exercises, speech recognition programs, online discussion forums, virtual language labs, and other technology-based ways for ESP students to learn to speak. These techniques make it easier for students to learn to speak and help them improve their speaking skills. The article also notes that in order to change the old teaching methods, teachers should also learn convenient, reliable and effective teaching methods for ESP students to learn to speak. The article provides good information on methods and resources for ESP students to use technology to help them learn to speak. This information will be useful for teachers and students and will help students improve their speaking and listening skills. This article shows ESP students easy, reliable and effective methods for learning to speak, and these methods can be well used in the future teaching process for teachers and students.*

Keywords: *ESP, speaking, technology, online resources, speaking exercises, speech recognition programs, discussion forums, virtual language labs, teaching methods.*

Annotatsiya: *Bu maqola texnologiyadan foydalangan holda ESP (Ingliz tili mahsus maqsadlar uchun) talabalariga gapirishni o'rganishni maslahatlar va tavsiyalar bilan ko'rsatadi. Bu maqolada ESP talabalariga gapirishni o'rganish uchun onlayn resurslar, gaplashish mashg'ulotlari, nutqni taniqliq dasturlari, online muzokaralar forumlari, virtual language labs va boshqa texnologiyadan foydalangan usullar ko'rsatiladi. Bu usullar talabalar uchun gapirishni o'rganishni osonlashtiradi va ularni gaplashish ko'nikmalarini oshirishga yordam beradi. Maqolada ayni paytda, eskiy o'qitish usullarini o'zgartirish uchun, o'qituvchilar ESP talabalariga gapirishni o'rganish uchun qulay, o'zaro ishonchli va samarali o'quv usullarini ham o'rganishlari kerakligi qayd etiladi. Maqola ESP talabalariga gapirishni o'rganish uchun foydali texnologiyadan foydalangan usullar va resurslar haqida yaxshi ma'lumotlar ko'rsatadi. Bu ma'lumotlar o'qituvchilar va talabalar uchun foydali bo'ladi va talabalarning gaplashish va tinglash ko'nikmalarini oshirishga yordam beradi. Bu maqola ESP talabalariga gapirishni o'rganish uchun qulay, o'zaro ishonchli va samarali usullar ko'rsatadi va bu usullar o'qituvchilar va talabalar uchun kelajakdagi o'quv jarayonida yaxshi ishlatilishi mumkin.*

Kalit so'zlar: *ESP, gapirish, texnologiya, onlayn resurslar, gaplashish mashg'ulotlari, nutqni taniqliq dasturlari, muzokaralar forumlari, virtual language labs, o'qitish usullari.*

Аннотация: В этой статье приведены советы и рекомендации по обучению студентов ESP (английский для специальных целей) говорить с использованием технологий. В этой статье описаны онлайн-ресурсы, разговорные упражнения, программы распознавания речи, онлайн-

дискуссионные форумы, виртуальные лингафонные лаборатории и другие основанные на технологиях способы, с помощью которых студенты ESP могут научиться говорить. Эти методы облегчают учащимся изучение речи и помогают им улучшить свои разговорные навыки. В статье также отмечается, что для того, чтобы изменить старые методы обучения, учителя также должны изучить удобные, надежные и эффективные методы обучения студентов ESP, чтобы научиться говорить. В статье содержится полезная информация о методах и ресурсах, позволяющих студентам ESP использовать технологии, помогающие им научиться говорить. Эта информация будет полезна учителям и учащимся и поможет учащимся улучшить свои навыки говорения и аудирования. В этой статье учащимся ESP показаны простые, надежные и эффективные методы обучения говорению, и эти методы могут быть хорошо использованы в будущем учебном процессе учителями и учащимися.

Ключевые слова: ESP, говорение, технология, онлайн-ресурсы, разговорные упражнения, программы распознавания речи, дискуссионные форумы, виртуальные лингафонные лаборатории, методы обучения.

Teaching speaking skills to English for Specific Purposes (ESP) students using technology can be an effective way to engage students and improve their language proficiency. Here are some tips on how to do it:

1. Use video conferencing tools: Video conferencing tools like Zoom, Skype or Google Meet can be used to conduct live speaking sessions with students. You can conduct one-on-one or group sessions, and use features like screen sharing, breakout rooms, and virtual whiteboards to make the sessions interactive.

2. Use speech recognition software: Speech recognition software like Dragon NaturallySpeaking or Google Speech Recognition can be used to help students practice their speaking skills. You can provide students with prompts and have them record their responses, which can then be analyzed by the software to provide feedback on pronunciation and grammar.

3. Use online discussion forums: Online discussion forums like Padlet or Edmodo can be used to facilitate asynchronous speaking practice. You can post discussion prompts and have students record their responses using tools like Vocaroo or Flipgrid. Students can then listen to and comment on each other's responses.

4. Use language learning apps: Language learning apps like Duolingo or Busuu can be used to help students practice speaking skills. These apps often include features like speech recognition and interactive exercises that can help students improve their pronunciation and grammar.

5. Use online speech resources: There are many online resources available that can help students improve their speaking skills. Websites like BBC Learning English or ESL Podcast have audio and video resources that can be used for listening and speaking practice.

Overall, using technology to teach speaking skills to ESP students can be a great way to engage them and provide them with valuable practice opportunities. However, it's important to remember that technology should be used to supplement, not replace, traditional teaching methods[1, 429].

Yes, you can use other technologies to teach ESP students how to speak. You can use the following technologies:

1. Podcasts: Podcasts can be good speaking exercises for students. In addition to engaging listening and talking, podcasts offer material for students on a range of topics.

2. E-books: E-books can also be used as a good resource for ESP students to learn to speak. E-books offer topic-specific documentation, additional useful information, and hands-on activities for students.

3. Online Games: Online games can be good activities for ESP students. Games allow students to learn to solve questions about topics, teach vocabulary and understand concepts.

4. Blogs: Blogs can also be used as a good resource for ESP students to learn to speak. Blogs can contain text, images, and videos on topics.

5. Online Videos: Online videos can also be useful for ESP students to learn to speak. Online videos offer students information on topics, activities to improve speaking skills and pronunciation.

All short, ESP students can use technology to learn to speak. These technologies help students learn to think and talk about topics and keep students engaged and interested in learning.

Using technology to help ESP (English for Specific Purposes) students learn to speak includes:

1. Use video conferencing tools: Video conferencing tools such as Zoom, Skype or Google Meet are convenient for students to organize secret speaking

sessions. You can have one-on-one or group chat sessions and take advantage of features like screen mirroring, extra rooms, and virtual blackouts.

2. Use speech recognition software: Dragon NaturallySpeaking or Google Speech recognition software can be useful for improving students' speaking skills. You can give instructions to students and have them type into the system to learn how to type your answers. By analyzing these responses, the program provides feedback to students on pronunciation and comprehension.

3. Use online discussion forums: Online discussion forums like Padlet or Edmodo can help organize asynchronous speaking activities. You can post prompts for discussions and students can record their responses using their own support tools, such as Vocaroo or Flipgrid. Students can listen to further discussions and leave comments on their answers.

4. Use language learning programs: Language learning programs like Duolingo or Busuu can be useful for students to improve their speaking skills. These programs have features such as speech recognition and interactive exercises to improve pronunciation and grammar.

5. Online speech resources: Online speaking resources, such as BBC Learning English or the ESL Podcast, offer audio and video for students to practice speaking and listening.

6. Virtual Language Labs: Virtual Language Labs help organize programs with virtual writing sessions and speaking opportunities for students to learn speaking skills.

All in all, teaching ESP students to speak using technology can produce good results and keep them engaged with their fans. But don't forget to use technology to change old teaching methods[2, 170].

The following online resources are available for ESP (English for Specific Purposes) students to learn to speak:

1. BBC Learning English: The BBC Learning English site offers many audio, video, speaking and listening activities for students. This site offers ESP students topics and language skills relevant to our language.

2. ESLPodcast: The ESLPodcast site offers English talks, speaking exercises, and leadership information for students. Topics include business, politics, and culture.

3. Breaking News English: Breaking News English offers English translation and topic-based speaking exercises for students. This site serves as a good resource for students to learn how to read and talk about the news.

4. TED Talks: The TED Talks site offers inspirational topics for students and serves as a good resource for learning to speak English. TED Talks are also a good resource for improving speaking skills, and students can have fun learning to speak and listen.

5. Voice of America: The Voice of America website offers news, videos and audio in English for students. This site serves as a good resource for students to learn how to read and talk about the news.

All short, there are online resources for ESP students to learn to speak. These resources serve as a good resource for students to improve their language skills and improve their speaking skills. Students learn and improve their English by using these resources[3, 475].

Online discussion forums for ESP (English for Specific Purposes) students to learn to speak include:

1. Edmodo: Edmodo is a social network for students and teachers. This network is convenient for ESP students for speaking practice, as it provides an opportunity for students to improve their speaking and writing skills. Through Edmodo, students can structure speaking activities for cross-linking and for teachers to check answers.

2. Flipgrid: Flipgrid is a friendly social network for students and teachers, a good resource for additional advice and to talk to each other. This network is convenient for ESP students to learn to speak, as students can structure speaking activities to link together and teachers to check answers.

3. Padlet: Padlet is a convenient online social network for linking student speaking activities. This network is convenient for ESP students to learn speaking skills, because students can write their thoughts, add pictures, videos and other multimedia materials.

4. Google Classroom: Google Classroom is a social network for students and teachers. This network is convenient for ESP students to learn speaking activities, as it provides an opportunity for students to improve their speaking and writing skills. Through Google Classroom, students can structure speaking activities for linking and teachers to check answers[4, 283].

5. Voxer: Voxer is a convenient online social network for linking student speaking activities. This network is convenient for ESP students to learn to speak, because students can write their thoughts, add pictures, videos and other multimedia materials. With Voxer, students can structure speaking activities for cross-linking and for teachers to check answers.

These forums serve as a good resource for students to learn ESP pronunciation and speaking. Through these forums, students can learn to hear, respond, and communicate with each other. These forums serve as a good resource for students to learn to speak, as they help students learn to express themselves and learn to speak[5, 152].

Conclusions

The article Teaching ESP Students to Speak Using Technology shows the importance and convenience of using technology in learning to speak for ESP students. The article provides an overview of online resources, speech recognition programs, discussion forums, virtual language labs, and other technology-enabled methods for ESP students to learn to speak.

Online resources, such as BBC Learning English or the ESL Podcast, offer audio and video for students to practice speaking and listening. Speech recognition software such as Dragon NaturallySpeaking or Google Speech can be useful for students to improve their speaking skills. Discussion forums, such as online forums such as Edmodo or Flipgrid, are convenient for students to talk to each other and share ideas. Virtual language labs, such as Rosetta Stone or Duolingo, offer customized learning processes for students to learn to speak.

The article shows convenient, innovative methods for students and teachers and facilitates the process of learning to speak for ESP students. This article serves as a handy resource for students and teachers of ESP, and shows several methods for learning to speak using technology.
